Queensland business owners—are you looking to drive down your electricity consumption and costs?

We've got some rebates that can help.

Small to medium businesses that purchase and install eligible energy efficient equipment can apply for rebates of up to \$12,500 to cover 50% of energy efficiency upgrade costs. This could include heating and cooling systems, 4-star energy rated appliances, lighting upgrades and more.

QBEST rebates are now available until the funding round closes.

For the full eligibility requirements and to apply, visit [www.business.qld.gov.au/QBEST](http://www.business.qld.gov.au/QBEST)
